# RITIK DUBEY

B.Tech Computer Science Engineering (AI & ML) | Python Developer | Data Analyst | Machine Learning
Varanasi, India | 6307523679 | ritikdubey461@gmail.com
LinkedIn: linkedin.com/in/ritik-dubey-65b317340 | GitHub: github.com/Ritik7755 | Portfolio: ritikd-portfolio.vercel.app

## PROFESSIONAL SUMMARY

Final-year B.Tech CSE (AI & ML) student with hands-on experience in Python, SQL (PostgreSQL), Data Analytics, Machine Learning, and Web Development. Built and deployed end-to-end ML applications using Scikit-learn, FastAPI, and Pydantic, and delivered data analysis projects using Pandas, NumPy, and Seaborn. Completed three internships spanning data science, generative AI, and industrial systems. Seeking entry-level roles in Python Development, Data Analytics, or Machine Learning.

## TECHNICAL SKILLS

**Programming Languages:** Python, SQL, HTML, CSS, JavaScript
**Databases:** PostgreSQL, SQL Queries, Subqueries, Aggregations, GROUP BY, Date Functions, UNION
**Data Analytics:** Pandas, NumPy, Data Cleaning, Data Visualization, Exploratory Data Analysis (EDA), Seaborn
**Machine Learning & AI:** Machine Learning, Scikit-learn, Feature Engineering, Hyperparameter Tuning, Generative AI, Agentic AI, Retrieval-Augmented Generation (RAG)
**Backend Development:** FastAPI, Pydantic, REST API Development
**AI Tools:** Claude, ChatGPT, Google AI Studio (Gemini), Google Antigravity, Prompt Engineering, AI-Assisted Development
**Tools & Platforms:** MS Excel, Power BI, Git, GitHub, Render, Vercel

## EXPERIENCE & INDUSTRIAL TRAINING

**Data Science with Python Intern | ElSystems Technologies | Jun 2026 – Aug 2026**
- Completed an 8-week Data Science internship focused on applied Python and machine learning workflows.
- Developed a Crop Yield Prediction System using Python and machine learning, and submitted a full project report.

**AI for Sustainability Virtual Intern | 1M1B, AICTE & IBM SkillsBuild | May 2026 – Jun 2026**
- Gained practical experience applying AI to sustainability challenges aligned with UN Sustainable Development Goals.
- Explored Agentic AI and Retrieval-Augmented Generation (RAG) systems for real-world problem solving.

**Industrial Training Intern | Banaras Locomotive Works (BLW), Indian Railways | Jun 2026 – Jul 2026**
- Completed industrial training as part of the B.Tech CSE curriculum at BLW, Varanasi.
- Trained in CNC Programming (Planning), EDP, and LTS (Locomotive Software) systems.
- Gained exposure to industrial planning, software systems, and technical workflows.

## PROJECTS

**Student Mental Health Prediction System | Python, Scikit-learn, FastAPI, Pydantic, HTML/CSS/JavaScript**
- Built an end-to-end ML prediction system: feature engineering, model training, and hyperparameter tuning with Scikit-learn.
- Compared models: Linear Regression (R-squared 0.74) vs Random Forest (R-squared 0.89, MAE 0.33, RMSE 0.46); tuning narrowed the train–test gap (train R-squared 0.98 to 0.97).
- Built FastAPI REST APIs with Pydantic validation and an HTML/CSS/JavaScript frontend; deployed on Render.
- Live: https://mansic-santulan-score-1-rad3.onrender.com/ | GitHub: https://github.com/Ritik7755/Mansic_Santulan_Score

**TravelLedger Hub (LocalTravelOS) | HTML, CSS, JavaScript, Vercel**
- Built a hyperlocal travel web app in HTML, CSS, and JavaScript connecting tourists with local service providers such as guides, drivers, stays, and food vendors.
- Implemented role-based sign-in, provider search with category and trust-score filters, sorting, side-by-side comparison, map view, and in-app chat.
- Developed a trip planner with itinerary, expense tracking, wishlist, and CSV export, plus a provider dashboard.
- Live: https://local-travel-os.vercel.app/ | GitHub: https://github.com/Ritik7755/LocalTravelOS

**SQL Mini Project: Students, Books & Internship Analysis | PostgreSQL**
- Wrote 50+ PostgreSQL queries across three tables (students, books, internship) to answer business-style questions on enrollment, pricing, discounts, and salaries.
- Used subqueries, aggregations with GROUP BY, UNION ALL, date functions (EXTRACT, AGE), type casting, and LIMIT/OFFSET for ranking and top-N results.

**Amazon Diwali Sales Analysis | Python, Pandas, NumPy, Seaborn**
- Analyzed customer and sales data using Python and Pandas to identify purchasing patterns and sales trends.
- Built Seaborn visualizations to surface customer behavior and product performance insights.
- GitHub: https://github.com/Ritik7755/--amazon-sales-analysis

**IPL Data Analysis | Python, Pandas, NumPy, Seaborn**
- Analyzed IPL datasets using Python, Pandas, and NumPy to identify trends and player performance patterns.
- Created data visualizations using Seaborn to present analytical insights.
- GitHub: https://github.com/Ritik7755/-ipl-2025-data-analysis

## EDUCATION

**B.Tech, Computer Science Engineering (AI & ML) | Kashi Institute of Technology (AKTU) | 2023 – 2027**
- CGPA: 7.71 / 10

## CERTIFICATIONS

Generative AI & Machine Learning — NASSCOM | AI Foundations — Oracle | Data Analytics — Deloitte | Generative AI — Google | Software Engineering Job Simulation — JPMorgan Chase & Co.
