RITIK DUBEY

B.Tech CSE (AI & ML) | Python | Data Analytics | Machine Learning

CONTACT

Phone: 6307523679 | **Email:** ritikdubey461@gmail.com | **Location:** Varanasi, India

PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science Engineering (AI & ML) student with hands-on experience in Python, Data Analytics, Machine Learning and Web Development. Experienced in working with real-world datasets, data analysis, visualization and technical projects. Completed internships and industrial training with exposure to AI/ML workflows, web development and software systems. Seeking entry-level opportunities in Python, Data Analytics, Machine Learning or AI/ML.

EDUCATION

Kashi Institute of Technology (AKTU) — B.Tech in Computer Science Engineering (AI & ML) | 2023–2027

CGPA: 7.71 | **Class 12:** 71% | **Class 10:** 82%

TECHNICAL SKILLS

Programming: Python, HTML, CSS, JavaScript

Backend Development: FastAPI, Pydantic, API Development

Data Analytics: Pandas, NumPy, Data Cleaning, Data Visualization, Exploratory Data Analysis (EDA), Seaborn

Machine Learning & AI: Machine Learning, Generative AI, AI Tools

Tools: MS Excel, Power BI, Git, GitHub

EXPERIENCE & INDUSTRIAL TRAINING

Data Science with Python Intern | EISystems Technologies / EISystems Services | Jun 2026 – Aug 2026

- Completed an 8-week internship in Data Science with Python.
- Developed a Crop Yield Prediction System as part of the internship and submitted the project report.

AI for Sustainability Virtual Intern | 1M1B, AICTE & IBM SkillsBuild | May 2026 – Jun 2026

- Gained practical experience in AI, sustainability concepts aligned with UN Sustainable Development Goals.
- Explored Agentic AI and Retrieval-Augmented Generation (RAG) systems for real-life problem solving.

Industrial Training Intern -Banaras Locomotive Works (BLW), Indian Railways | 16 Jun 2026 – 13 Jul 2026

- Successfully completed industrial training at BLW, Varanasi as part of B.Tech CSE curriculum.
- Received practical training in **Planning (CNC Programming), EDP and LTS (Locomotive Software)**.
- Gained exposure to industrial planning, software systems and technical workflows.

PROJECTS

Student Mental Health Prediction System | Python, Scikit-learn, FastAPI, Pydantic, HTML, CSS, JavaScript

- Built ML prediction system, feature engineering, model training and hyperparameter tuning using Scikit-learn.
- FastAPI APIs with Pydantic validation, integrated an HTML/CSS/JavaScript frontend, and deployed on Render.

Amazon Diwali Sales Analysis | Python, Pandas, NumPy, Seaborn

- Analyzed customer and sales data using Python and Pandas to identify purchasing patterns and sales trends.
- Used data visualization techniques with Seaborn to understand customer behavior and product performance.

IPL Data Analysis | Python, Pandas, NumPy, Seaborn

- Analyzed IPL datasets using Python, Pandas and NumPy ,identify trends and patterns and player performance.
- Created data visualizations using Seaborn to present analytical insights.
